PROFESSIONAL SUMMARY

Principal Software Engineer with 5+ years at Flexspring, a B2B HR platform with 2,500+ enterprise clients. I build full-stack features end-to-end: Spring Boot microservices, event-driven systems, React UIs. I own the File Manager service end-to-end (built from scratch as sole engineer), architected the platform's agentic AI library, and lead zero-regression migrations. I also deliver production AI features (field recommendations, transaction intelligence, AI Assembly automation) with caching, fallback, and governance. AWS Certified AI Practitioner. Builds Chrome extensions, CLIs, and dashboards on the side.

CORE SKILLS

- **Languages & Runtime:** JavaScript, TypeScript, Node.js, Java 17, Python (Scikit-learn, Pandas, NumPy)
- **Frontend:** React.js (React 18, React Router v7, Vite 7, @tanstack), Chrome Extension Development (Manifest V3)
- **Backend & API:** RESTful API Design, Node.js, Spring Boot 3, Spring Cloud Gateway, Quarkus, OpenAPI 3 / Swagger, CLI Development
- **Testing & Quality:** Jest, ts-jest, JUnit, Test Automation, Code Review, SonarQube
- **Cloud & DevOps:** Docker, Kubernetes, AWS (S3, SQS), Jenkins, CI/CD Pipelines, Release Management, Git, Sentry
- **Data & Search:** PostgreSQL, MongoDB, MySQL, Redis / Redisson, ETL Pipeline Design
- **AI & Emerging Tech:** LLM Integration, LiteLLM, Embeddings & Cosine Similarity, Multi-Provider AI Streaming, On-Device AI (Gemini Nano), RAG
- **Architecture & Practices:** Microservices, Event-Driven Architecture, Distributed Systems, Agile, Domain-Driven Design, Mentorship

PROFESSIONAL EXPERIENCE

Principal Software Engineer | Flexspring | Ottawa, ON | Aug 2026 - Present

B2B content management and delivery platform serving 2,500+ client configurations

- Promoted to Principal Software Engineer, leading technical direction, architecture decisions, and delivery of Flexspring's AI and integration platform.

Software and AI Engineer | Flexspring | Ottawa, ON | May 2024 - Aug 2026

- Built AI-driven field recommendation system for Data Mapping with embedding-based reranking, cosine similarity matching, Redisson caching, and LiteLLM fallback. React.js frontend with debounce/abort/retry logic, per-target suggestions, bulk recommendation, and role-based AI gating
- Hardened platform-wide LLM integration by adding unit tests, resolving SonarQube findings, and replacing hardcoded API keys with a secure config layer reused across Monitor, Studio, and shared libraries
- Built a PostgreSQL-to-MongoDB webhook template migration tool for the platform's data-layer consolidation
- Built flexspring-file-manager from scratch as sole engineer. Standalone Quarkus microservice with multi-region AWS S3 storage (US/EU), MongoDB metadata, per-item permissions, SQS event-driven reconciliation, Sentry observability, and OIDC auth via AWS Cognito. Containerized with Docker. Shipped service, API gateway, and React.js UI to production
- Designed and implemented Monitor Lifecycle: Spring Boot REST API, JMS/ActiveMQ consumer for event-driven ingestion from Engine, PostgreSQL/MongoDB schema updates, and React UI for project and integration flows
- Built Studio AI Analysis feature that generates analysis of integration configurations to surface issues and optimization opportunities using LLM capabilities
- Shipped Webhook Templates across Engine, Studio, Webhook Core, Webhook Explorer, and Onboard API with Template ID propagation and integration-level filtering
- Led Spring Boot 3 migration of Flexspring Studio. Updated framework dependencies, resolved breaking API changes, validated end-to-end, deployed to production with no regression. Refactored Jenkinsfile in Webhook Core to improve CI/CD pipeline reliability
- Delivered Credentials Manager full-stack: Spring Boot REST API, ConnectorHub integration, React.js UI with connector-specific form rendering, client-side field encryption, and automated email dispatch

- Upgraded Monitor UI to React 18.3, React Router v7, and Vite 7. Migrated data-fetching from react-query to @tanstack/react-query (v5) and upgraded the shared React component library for cross-platform compatibility

Software Engineer Intern | Flexspring | Montreal, QC | May 2023 - May 2024

- Led Alcatraz Java 8 to 17 and Spring Boot 2 to 3.0.6 upgrades. Resolved JMS/ActiveMQ configuration and HealthChecker incompatibilities from the framework change. Deployed to production with no regression
- Delivered Monitor Pilot UI redesign: template-based rebuild of authentication flows, navigation, responsive layouts, Dashboard Widgets, and Organization/Execution/Transaction list views with server-side pagination and filtering in React.js with react-table
- Built Credentials Manager foundation: Spring Boot REST API with ConnectorHub integration and React.js UI for credential list and add/update forms with connector-specific field rendering

Full Stack Software Developer | BSRM | Chittagong, Bangladesh | Apr 2019 - Jun 2021

One of Bangladesh's largest steel manufacturers

- Built APS Dashboard X (React, Node.js, SQLite) for consumables procurement, stock management, and shipment scheduling. Increased Material Requirement Planning efficiency by 89%. Nominated for Young Supply Chain Talent of the Year at IPDC Supply Chain Awards 2019
- Engineered ETL pipelines integrating 40+ supplier systems into PostgreSQL-based procurement analytics with 100% audit compliance. Developed Python (Scikit-learn, Pandas) ML forecasting module that reduced overstock by 15%

PROJECTS

fetch-markdown | TypeScript, Chrome Extension | github.com/shafiqimtiaz/fetch-markdown

- Converts any web page to clean Markdown with site-adaptive extraction, code-aware formatting, and tracking-param stripping. [Chrome Web Store](#)

nexus-ai | Next.js, TypeScript | github.com/shafiqimtiaz/nexus-ai

- AI academic organizer that unifies announcements, calendar, and resources with agentic chat and integrates Google Classroom, Discord, and Slack. [Live demo](#)

ctx-handoff | TypeScript, Node.js, Deno Deploy | github.com/shafiqimtiaz/ctx-handoff

- Encrypted, ephemeral context handoff CLI for AI coding agents: AES-256-GCM encryption, blobs expire in 24h. [npm](#)

clean-bookmarks | TypeScript, Node.js, Chrome MV3 | github.com/shafiqimtiaz/clean-bookmarks

- AI-powered bookmark organizer with two-pass categorization, on-device Gemini Nano, and multi-provider streaming. [Chrome Web Store](#) · [Live demo](#)

EDUCATION

- **MEng Software Engineering (Co-op) | Concordia University | Montreal, QC | 2022 - 2024**
- **BSc Electrical and Electronics Engineering | Islamic University of Technology | Bangladesh | 2015 - 2018**

CERTIFICATIONS

- **AWS Certified AI Practitioner | Amazon Web Services | Nov 2025**

VOLUNTEER EXPERIENCE

- **Director of Sponsorship | HackConcordia | Montreal, QC | Oct 2022 - Apr 2023**
 - Organized ConUHacks VII, the largest hackathon in Quebec with 800+ participants from 97 universities
