Toronto, ON

PROFESSIONAL SUMMARY

Principal Software Engineer with 5+ years of full-stack experience driving architecture and delivery for enterprise B2B platforms. Specializes in scalable microservices, event-driven systems, and production-grade AI solutions. Known for taking end-to-end ownership of complex domains—from building core services from scratch to architecting reusable agentic AI frameworks. Excels at leading zero-regression migrations and shipping intelligent, reliable features. AWS Certified AI Practitioner and active builder of developer tools.

CORE SKILLS

- **Languages & Runtime:** JavaScript, TypeScript, Node.js, Java 17, Python
- **Frontend:** React.js (React 18, React Router v7, Vite 7, @tanstack), Chrome Extension Development
- **Backend & API:** RESTful API Design, Node.js, Spring Boot 3, Spring Cloud Gateway, Quarkus, OpenAPI 3 / Swagger, CLI Development
- **Testing & Quality:** Jest, ts-jest, JUnit, Test Automation, Code Review, SonarQube
- **Cloud & DevOps:** Docker, Kubernetes, AWS (S3, SQS), Jenkins, CI/CD Pipelines, Release Management, Git, Sentry
- **Data & Search:** PostgreSQL, MongoDB, MySQL, Redis / Redisson, Data Integration
- **AI & Emerging Tech:** LLM Integration, LiteLLM, Embeddings & Cosine Similarity, Multi-Provider AI Streaming, On-Device AI (Gemini Nano), RAG, AI Safety Guardrails
- **API & Reliability:** Bearer Authentication, Service Health Checks, API Gateway Configuration, Production Debugging
- **Architecture & Practices:** Microservices, Event-Driven Architecture, Distributed Systems, Agile, Domain-Driven Design, Mentorship

PROFESSIONAL EXPERIENCE

Principal Software Engineer | Flexspring | Toronto, ON | Aug 2026 - Present

B2B content management and delivery platform serving 2,500+ client configurations

- Promoted to Principal Software Engineer, leading technical direction, architecture decisions, and delivery of Flexspring's AI and integration platform
- Leading lifecycle-driven provisioning across Studio, Services, and Wizard, connecting AI-generated integration design with automated credentials, mapping and lookup provisioning

Software and AI Engineer | Flexspring | Ottawa, ON | May 2024 - Aug 2026

- Built production AI capabilities for Data Mapping and platform LLM integration, plus AI-assisted transaction-detail views for simplified review, improving recommendation quality, reliability, and governance across Monitor and shared libraries
- Contributed to the AI Assembly / Video Transcription initiative, shipping Gemini-based video transcription that powers Wizard content synchronization
- Architected and developed **flexspring-agent-core**, a reusable foundation for standardized AI-agent development across the Flexspring ecosystem
- Built flexspring-file-manager from scratch as sole engineer, delivering a production full-stack service with regional storage, event-driven synchronization, permissions, authentication, observability, and Monitor integration
- Designed and implemented Monitor and Studio Lifecycle end-to-end across project and integration flows, storing lifecycle events on the integration entity for traceability and debugging while connecting user experience, services, and data models
- Built Monitor's Service Manager, covering service listings, subscribe/unsubscribe flows, and subscription-based availability gating for services like File Manager and Approval Manager
- Built core Webhook Template capabilities across Engine, Studio, Monitor, Webhook Core, Webhook Explorer, and Onboard, including shared management, permissions, synchronization, deployment-driven configuration, and migration tooling

- Expanded Mapping Service capabilities and designed Agora's project-linked Integrations domain to support governed mapping and integration management
- Built Studio V2 AI Analysis end-to-end, providing role-based integration quality assessments and optimization recommendations; led Studio's Spring Boot 3 migration and broader platform modernization
- Delivered Credentials Manager full-stack, including API, ConnectorHub integration, React UI, secure field handling, notifications, and request lifecycle management
- Runners-up and \$1,000 prize at the internal hackathon for a RAG-powered chatbot built on Crewdle AI and Flexspring data

Software Engineer Intern | Flexspring | Montreal, QC | May 2023 - May 2024

- Delivered Monitor Pilot's template-based UI across authentication, navigation, dashboards, organization and integration summaries, executions, transactions, and transaction details
- Built the foundation of Monitor Credentials Manager, delivering full-stack credential listing and add/update workflows with connector-specific forms, validation, caching, and search optimization
- Led Alcatraz modernization from Java 8 to Java 17 and Spring Boot 2 to Spring Boot 3, including compatibility and API documentation improvements
- Contributed to Onboard's template-based solution, shared Monitor/Onboard UI patterns, and File Manager service activation/deactivation

Full Stack Software Developer | BSRM | Chittagong, Bangladesh | Apr 2019 - Jun 2021

One of Bangladesh's largest steel manufacturers

- Built APS Dashboard X (React, Node.js, SQLite) for consumables procurement, stock management, and shipment scheduling. Increased Material Requirement Planning efficiency by 89%. Nominated for Young Supply Chain Talent of the Year at IPDC Supply Chain Awards 2019
- Built a supplier integration platform connecting 40+ vendor systems, delivering real-time inventory tracking, shipment visibility, and audit-compliant reporting dashboards across procurement workflows

PROJECTS

fetch-markdown | TypeScript, Chrome Extension | github.com/shafiqimtiaz/fetch-markdown

- Converts any web page to clean Markdown with site-adaptive extraction, code-aware formatting, and tracking-param stripping. [Chrome Web Store](#)

nexus-ai | Next.js, TypeScript | github.com/shafiqimtiaz/nexus-ai

- AI academic organizer that unifies announcements, calendar, and resources with agentic chat and integrates Google Classroom, Discord, and Slack. [Live demo](#)

ctx-handoff | TypeScript, Node.js, Deno Deploy | github.com/shafiqimtiaz/ctx-handoff

- Encrypted, ephemeral context handoff CLI for AI coding agents: AES-256-GCM encryption, blobs expire in 24h. [npm](#)

clean-bookmarks | TypeScript, Node.js, Chrome MV3 | github.com/shafiqimtiaz/clean-bookmarks

- AI-powered bookmark organizer with two-pass categorization, on-device Gemini Nano, and multi-provider streaming. [Chrome Web Store](#) · [Live demo](#)

EDUCATION

- **MEng Software Engineering (Co-op)** | Concordia University | Montreal, QC | 2022 - 2024
- **BSc Electrical and Electronics Engineering** | Islamic University of Technology | Bangladesh | 2015 - 2018

CERTIFICATIONS

- **AWS Certified AI Practitioner** | Amazon Web Services | Nov 2025

VOLUNTEER EXPERIENCE

- **Director of Sponsorship** | HackConcordia | Montreal, QC | Oct 2022 - Apr 2023
 - Organized ConUHacks VII, the largest hackathon in Quebec with 800+ participants from 97 universities
