Professional Summary

Senior Software Engineer - Principal with experience building AI-enabled integration products, backend services, and full-stack systems across TypeScript, Java, Python, React, Node.js, and Spring Boot. Reduced integration creation time by 90%, supported 2,500+ B2B client configurations, and improved manual review time by 50% through AI-powered workflows.

Work Experience

Flexspring Aug 2026 - Present
Senior Software Engineer - Principal *Remote | Toronto, ON*

- Lead the AI Integration Assembly Line across 2,500+ B2B client configurations: the Wizard turns synced Google Drive documents and videos (Whisper transcription) into credentials, mapping tables and lookup tables, reducing integration creation time by 90%.
- Hardened the Wizard API (releases 1.4 to 1.17) with per-caller bearer tokens, credential masking, a model per step and LLM cost tracking.
- Released Agent Core to the team as a shared Claude Code plugin with a review step before every commit and pinned MCP server versions.
- Built Local Stack, a one-command local environment for the whole platform with per-service logs and a terminal dashboard with saved service profiles.
- Moving every Wizard AI step to a new Wizard AI Server on LangChain and LangGraph, with LangSmith tracing.
- Mentored interns and incoming developers; use Claude Code for professional and Codex for personal development.

Flexspring May 2024 - Aug 2026
Software Engineer - R&D and AI *Remote | Ottawa, ON*

- Engineered AI field recommendations for data mapping with embeddings, reranking, a LiteLLM fallback and Redis caching, raising the confidence threshold from 0.55 to 0.80 and reducing manual review time by 50%.
- Developed Studio AI Analysis on Amazon Bedrock to evaluate 50,000+ integrations, with persona prompts and sensitive-data blocking.
- Migrated 5 core microservices to Spring Boot 3, improving API latency by 20%.
- Built Credentials Manager for securely managing third-party API credentials across 8,000+ active client integrations.
- Built Integration Snapshots (Bitbucket version history with encrypted secrets) and Webhook Templates across Webhook Explorer, the Modeler, Studio and Monitor, moving template data from PostgreSQL to MongoDB.

Flexspring May 2023 - May 2024
Software Engineer Intern *Remote | Montreal, QC*

- Modernized 3 legacy services from Java 8 to Java 17 and Spring Boot 2 to Spring Boot 3.
- Delivered 20+ reusable UI components for Monitor Pilot dashboard, improving rendering performance by 40%.

BSRM Apr 2019 - Jun 2021
Full Stack Software Developer *Chittagong, Bangladesh*

- Built procurement dashboard using React, Node.js, and SQLite, improving Material Requirement Planning efficiency by 89%.
- Developed supplier integration platform connecting 40+ vendor systems with real-time inventory visibility and reporting.

Projects

Nexus AI - Personal Academic Concierge *Personal Project | Gemini, Vercel AI SDK, Google Classroom MCP, Discord, Slack, Google Calendar*

- Agent-first academic workspace unifying Google Classroom, Discord, Slack, and Google Calendar: a Gemini agent on the Vercel AI SDK with a local Google Classroom MCP server extracts exam dates, generates multi-day study plans, and writes them to Google Calendar.

Flexspring-agent-core | *TypeScript, Claude Code, LiteLLM, MCP, Spec Driven Development*

- Built Flexspring's base library for AI agents, standardizing development across 3 product surfaces and reducing new-agent setup time from days to hours.
- Made it Claude Code only with a model per agent role (Opus, Sonnet or Haiku), grew tests from 81 to 132, and set up CI/CD with Nexus publishing.

Flexspring-file-manager | *TypeScript, Node.js, PostgreSQL, AWS S3*

- Built a multi-region event-driven file sync platform as the sole engineer, owning storage, sync, permissions, auth, and observability.

RAG Chatbot | *Crewdle AI, Embeddings, Vector Search, RAG*

- Developed an internal RAG-based chatbot with embeddings and vector search.
- Runner-up in a $1,000 hackathon and improved sales lead generation compared to manual processes.

Education

MEng Software Engineering (Co-op) *Concordia University*, Montreal, QC 2022 - 2024
BSc Electrical and Electronics Engineering *Islamic University of Technology*, Bangladesh 2015 - 2018

Certifications and Volunteer Experience

AWS Certified AI Practitioner *Amazon Web Services* Nov 2025
Director of Sponsorship *HackConcordia*: secured $10,000+ in corporate sponsorship funding; helped organize Quebec's largest hackathon with 800+ participants from 97 universities. 2022 - 2023

Skills

AI Engineering: LLM Integration, RAG, MCP, Embeddings, Reranking, Vector Databases, Agent Workflows, LangChain, LangGraph, LangSmith, LiteLLM, Amazon Bedrock, Claude Code, Function Calling, AI Evaluation, AI Observability, Structured Output
Languages: TypeScript, JavaScript, Java 17, Python, SQL
Backend: Node.js, Spring Boot 3, Quarkus, REST APIs, GraphQL, WebSocket, OpenAPI
Frontend: React 18, Next.js, Vite 7, TanStack Query, Chrome Extensions
Cloud & Data: AWS (S3, SQS), PostgreSQL, MongoDB, Redis, Docker, Kubernetes, GitHub Actions, CI/CD, Jenkins
