shafiqimtiaz@gmail.com | linkedin.com/in/shafiqimtiaz | github.com/shafiqimtiaz | Ottawa, ON

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years building search, content discovery, and AI-powered features in JavaScript, TypeScript, Node.js, and React.js for an enterprise platform serving 2,500+ client configurations. Shipped AI capabilities into production including an embedding-based recommendation engine with cosine similarity matching and LiteLLM fallback, AI-generated integration analysis, and full-text search across transaction payloads. Built standalone microservices in containerized environments with Jest test automation, Jenkins CI/CD, and production release management. AWS Certified AI Practitioner.

CORE SKILLS

- **Languages & Runtime:** JavaScript, TypeScript, Node.js, Java 17, Python (Scikit-learn, Pandas, NumPy)
- **Frontend:** React.js (React 18, React Router v7, Vite 7, @tanstack/react-query, React-Table), Chrome Extension Development (Manifest V3)
- **Backend & API:** RESTful API Design, Node.js, Spring Boot 3, Spring Cloud Gateway, Quarkus, OpenAPI 3 / Swagger, CLI Development
- **Testing & Quality:** Jest, ts-jest, JUnit, Test Automation, Code Review, SonarQube
- **Cloud & DevOps:** Docker, Kubernetes, AWS (S3, SQS), Jenkins, CI/CD Pipelines, Release Management, Git, Sentry
- **Data & Search:** PostgreSQL, MongoDB, MySQL, Redis / Redisson, Elasticsearch, Full-Text Search, ETL Pipeline Design
- **AI & Emerging Tech:** LLM Integration, LiteLLM, Embeddings & Cosine Similarity, Multi-Provider AI Streaming, On-Device AI (Gemini Nano), RAG
- **Architecture & Practices:** Microservices, Event-Driven Architecture, Distributed Systems, Agile, Domain-Driven Design, Mentorship

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Flexspring | Ottawa, ON | May 2026 - Present

B2B content management and delivery platform serving 2,500+ client configurations

- Built AI-driven field recommendation system for Data Mapping with embedding-based reranking, cosine similarity matching, Redisson caching, and LiteLLM fallback. React.js frontend with debounce/abort/retry logic, per-target suggestions, bulk recommendation, and role-based AI gating
- Hardened platform-wide LLM integration by adding unit tests, resolving SonarQube findings, and replacing hardcoded API keys with a secure config layer reused across Monitor, Studio, and shared libraries
- Added full-text search and nested/compound field support with breadcrumb navigation in the Data Mapping Modeler
- Built a PostgreSQL-to-MongoDB webhook template migration tool for the platform's data-layer consolidation

Software Engineer | Flexspring | Ottawa, ON | May 2024 - May 2026

- Built flexspring-file-manager from scratch as sole engineer. Standalone Quarkus microservice with multi-region AWS S3 storage (US/EU), MongoDB metadata, per-item permissions, SQS event-driven reconciliation, Sentry observability, and OIDC auth via AWS Cognito. Containerized with Docker. Shipped service, API gateway, and React.js UI to production
- Added full-text content search within Transaction payloads so users can filter by text content, not just metadata. Built file/folder search with case-insensitive matching in the File Manager UI
- Designed and implemented Monitor Lifecycle: Spring Boot REST API, JMS/ActiveMQ consumer for event-driven ingestion from Engine, PostgreSQL/MongoDB schema updates, and React.js UI for project and integration-level flows
- Built Studio AI Analysis feature that generates analysis of integration configurations to surface issues and optimization opportunities using LLM capabilities
- Shipped Webhook Templates across Engine, Studio, Webhook Core, Webhook Explorer, and Onboard API with Template ID propagation and integration-level filtering

- Led Spring Boot 3 migration of Flexspring Studio. Updated framework dependencies, resolved breaking API changes, validated end-to-end, deployed to production with no regression. Refactored Jenkinsfile in Webhook Core to improve CI/CD pipeline reliability
- Delivered Credentials Manager full-stack: Spring Boot REST API, ConnectorHub integration, React.js UI with connector-specific form rendering, client-side field encryption, and automated email dispatch
- Upgraded Monitor UI to React 18.3, React Router v7, and Vite 7. Migrated data-fetching from react-query to @tanstack/react-query (v5) and upgraded the shared React component library for cross-platform compatibility
- Wrote unit tests for File Manager covering core operations and permission enforcement. Extended test coverage for skill-installer, routing-builder, and config-generator modules
- Mentored three team members on Monitor architecture and File Manager internals. Authored internal service documentation and conducted code reviews across Monitor and Studio
- Won runners-up and \$1,000 prize at internal hackathon for a RAG-powered chatbot using Crewdle AI and Flexspring data

Software Engineer Intern | Flexspring | Montreal, QC | May 2023 - May 2024

- Led Alcatraz Java 8 to 17 and Spring Boot 2 to 3.0.6 upgrades. Resolved JMS/ActiveMQ configuration and HealthChecker incompatibilities from the framework change. Deployed to production with no regression
- Delivered Monitor Pilot UI redesign: template-based rebuild of authentication flows, navigation, responsive layouts, Dashboard Widgets, and Organization/Execution/Transaction list views with server-side pagination and filtering in React.js with react-table
- Built Credentials Manager foundation: Spring Boot REST API with ConnectorHub integration and React.js UI for credential list and add/update forms with connector-specific field rendering

Full Stack Software Developer | BSRM | Chittagong, Bangladesh | Apr 2019 - Jun 2021

One of Bangladesh's largest steel manufacturers

- Built APS Dashboard X (React, Node.js, SQLite) for consumables procurement, stock management, and shipment scheduling. Increased Material Requirement Planning efficiency by 89%. Nominated for Young Supply Chain Talent of the Year at IPDC Supply Chain Awards 2019
- Engineered ETL pipelines integrating 40+ supplier systems into PostgreSQL-based procurement analytics with 100% audit compliance. Developed Python (Scikit-learn, Pandas) ML forecasting module that reduced overstock by 15%

PROJECTS

Clean Bookmarks | TypeScript, Node.js, Chrome MV3 | github.com/shafiqimtiaz/clean-bookmarks

- Published on Chrome Web Store (5 releases). AI-powered bookmark organizer using two-pass categorization for content discovery. Supports on-device Gemini Nano and multi-provider AI streaming with Zod validation. Non-destructive with snapshot-and-restore. Live demo: shafiqimtiaz.github.io/clean-bookmarks

ctx-handoff | TypeScript, Node.js, Deno Deploy | github.com/shafiqimtiaz/ctx-handoff

- Agent-agnostic CLI for relaying session context via encrypted, ephemeral edge links. Zero-knowledge transport with AES-256-GCM; blobs expire after 24 hours. Optional Gemini distillation. Serverless on Deno Deploy.

EDUCATION

- **MEng Software Engineering (Co-op)** | Concordia University | Montreal, QC | 2022 - 2024
- **BSc Electrical and Electronics Engineering** | Islamic University of Technology | Bangladesh | 2015 - 2018

CERTIFICATIONS

- **AWS Certified AI Practitioner** | Amazon Web Services | Nov 2025

VOLUNTEER EXPERIENCE

- **Director of Sponsorship** | HackConcordia | Montreal, QC | Oct 2022 - Apr 2023
 - Organized ConUHacks VII, the largest hackathon in Quebec with 800+ participants from 97 universities
